

My name is Elizabeth A. Gasper. I was born on the date of September 15th, 1991 at Mount Meru Hospital in Arusha. I am the second child in a family of three children. I went to standard one at Meru primary school and I studied until standard seven (final grade in elementary school). I finished standard seven in 2006 and since then I have not attended school. I have been staying at home.

I live with my Mother, her name is Petro. She does a little work to get some money for food. My Mother cannot send me to school. My Father is named Atanas Gasper. Our Father has left our home in 1995 (I was 3 years old). My Father left our Mother and us. My Mother has not enough work to be able to send me to school. I am now searching for sponsors from America who can help me to become a person who can help many people.

My sister's name is Judith. She stays at home since 2005 when she finished standard seven. She has no work and no one to help her to go to school.

My brother's name is Dickson, he is in standard seven.

I would love to work in Tanzania. I want to study in college in America because I want to learn about the ways that I can help the people of Tanzania. I want to go to the Kilimanjaro region to change the desperate situation of many who live there. I would like to work here and become able to help many people who don't have anyone to help them. I will have learned much about the ways of helping when I am old enough to work. I will study my best in secondary school because I want to know how to make it better here in Tanzania and to help the many difficulties of the people here. That is my dream.

Thanks.
